

Expro Excellence SeaCure[®] zero shoetrack solution enables safe and reliable undergauge drill ahead

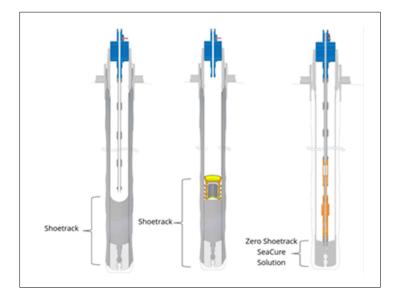

Well Construction | Cementing Technologies

Objectives and background

Expro Excellence

- Earlier under-gauge drill out of 20" surface casing can cause stuck BHA or even requiring a 17-1/2" clean out trip
- Clinical execution SeaCure[®] Cementing eliminates SSR plugs and shoetrack enabling slim drill ahead

Value to the client

- Saved SSR plugs, shoetrack, cement head and clean-out bit/BHA costs
- Shoe drilled out under gauge in 15 minutes
- Reduced cement job displacement volume by >30m³
- Saved more than ten hours of rig time
- Saved more than 65MT in CO₂ emissions
- Delivered zero NPT service execution
