Separator PVT sampling

Expro offers a complete, mercury free surface sampling package. During PVT and Isokinetic sampling from the test separator, both oil and gas samples are collected simultaneously, at controlled pressure. The temperature and pressure can be monitored and recorded to be included in the sampling report.

Specifications

PVT sampling skid

Pressure rating	350 bar
Temperature rating	-40 – 150 °C
Service	H ₂ S, CO ₂

Injectable probe

Pressure rating	200 bar
Temperature rating	-40 – 150 °C

Sampling control system

Working pressure up stream	350 bar
Working pressure down stream	100 bar
Temperature	-25 – 95 °C
Pressure Sensors max rating	100 – 700 bar
