

## Petrotech® Laboratories Water and Environmental Analyses

Petrotech Laboratories have long experience in sampling and analysis of water, oil and gas. Our clients come from the private sector, local governments, shipping and manufacturing companies. By means of broad and quality assured analytical spectra, we are able to offer complete analytical packages which meet the increasingly stringent requirements of public authorities. This includes microbiological, inorganic and organic analyses.

In addition Petrotech laboratories perform services such as sanitation certificate on board a vessel as well as sampling and analysis of offshore drinking water.

- Petrotech Laboratories are accredited with ISO 17025
- We can deliver speedy and reliable test results
- We can carry out sampling if required
- We can offer advice with the analysis results regarding regulations
- We use accredited subcontractors where necessary
