

# PowerChokes®

### **Model SCT Severe Service Drilling Choke**

The Model SCT is a forged body high pressure drilling choke for severe service, available as an adjustable or a positive model.

#### **Features**

#### Adjustable Choke

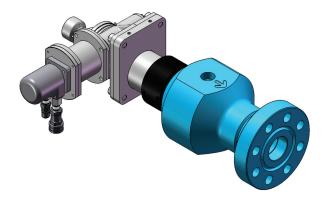

- Worm gear drive actuator eliminates backlash and provides precise control; self-locking to prevent movement even if hydraulic pressure is lost
- Quick change actuator no need to disconnect hoses for removal. Trim can be changed in 15 minutes or less without removing the choke from the line or breaking into the manifold
- Accommodates 1½", or 2" trim size
- Manual override capability provided on all worm gearoperated hydraulic chokes in case of power loss
- Other types of actuator available in addition to the exclusive modified worm gear actuator, our chokes available with hydraulic piston, electric or manual actuators
- Reversible gate and seat assembly provides a minimum of two uses per piece, saving parts, reducing operating costs and maximising efficiency. Can be reversed in the field
- Solid tungsten carbide gate and seat proven design provides maximum erosion resistance. Gate and seat are precisionground to provide drop tight shut off

#### Positive choke (except Model SCC)

- Quick change bean bonnet easily removable. Service tools available to remove bean and bean carrier quickly for inspection or replacement
- Numerous bean sizes accepts 1" (64/64ths) maximum orifice H2-style or OCT-style bean, or a 2" solid tungsten carbide bean seat (128/64ths)

#### All chokes

- Pressure balanced trim reduces operating forces, whether the choke is operated manually or automatically. Large balance ports provide protection against clogging
- Downstream wear sleeve and retainer ring extendedlength solid tungsten carbide seat provides wear protection downstream and a smooth transition for fluid into the downstream piping
- Large buffer cavity slows velocity and distributes impact of solids, maximising trim life

#### Actuator manipulator option

- Allows one-man, in-line servicing of chokes
- No lifting device required
- 15-minute service time

#### Control consoles

- Offer operation for one, two or more chokes and / or hydraulic control valves
- Speed adjusts to allow fast or slow choke movement
- One or two hydraulic pumps plus manual back up hydraulic pump
- Bourdon tube hydraulic pressure gauges or digital pressures gauges available
- Digital position indicator gauge standard
- Accumulators available for power backup or to smooth choke operation

#### Both adjustable and positive chokes supplied with:

- Bleeder port to bleed pressure from choke body prior to choke bonnet removal for inspection or maintenance
- Studded inlet X flanged outlet standard. Flanged inlets available
- 2 1/16" inlet X 3 1/16" outlet standard for use in Application Programme Interface (API) 5M, 10M or 15M service
- Other inlet and outlet sizes available

# PowerChokes®

## **Model SCT Severe Service Drilling Choke**

Standard configuration (Reversible, balanced, erosion-resistant trim)	
Inlet size range	21/16" to 31/16"
Outlet size range	21/16" to 31/16"
Trim sizes available	1¹/2", or 2"
Testing	Application Programme Interface (API) 6A, API 16C
Body material	Application Programme Interface (API) 75K, impact tested IAW NACE MR01-75
Throttling trim material	Tungsten carbide
Seat material	Tungsten carbide
Seat leakage	Drop tight
API temperature ranges	
Standard	-20°F to +250°F (-29°C to +121°C)
Optional	-75°F to +350°F (-60°C to +177°C)
API 6A PSL	1 - 3, 3G
API 6A PR	1 - 2
Standard X & Y	3.5" x 11.75"
General design specifications	
Open for controllability (maximum)	85%
Open for controllability (minimum)	2%
Exit velocity (maximum)	1.0 Mach
Downstream velocity (gas) (maximum)	0.3 Mach
Downstream velocity (liquid) (maximum)	100 - 200 ft/sec
Hydraulic operating pressure	1,800 psi - 2,000 psi
Seat leakage	Drop tight (Exceeds ANSI class V)
Throttling pressure drop	Full rated pressure

Note: Other sizes, configurations and pressure ratings are available to meet most applications, for more information contact your local Expro representative or email expro.powerchokes@exprogroup.com
