Casing Packers

Expro's Casing Packers are designed to provide reliable mechanical barrier to both open hole and cased hole situations. The high strength inflatable elements are designed to seal off even in the most irregular shaped wellbores.

Features

- The casing packers are available in a wide range of element sizes from 3' to 20' depending on your situation.
- The valves are able to be set at many different pressures to ensure that the packer operates when you need it to.
- 4.5" up to 13.375" with all common, specialty threads and material.
