

Well Construction

Frank's Tubular Running Services (TRS) - Casing Technologies

HORSESHOE® Casing Elevator

Features and Benefits

- Eliminates the need for personnel to be lifted in riding belts by latching directly onto the pipe in the v-door
- Allows for safe and rapid handling of large-O.D. pipe
- No padeyes or slings required
- No need to manipulate heavy doors, like those found on typical side door elevators
- Allows for lifting from the horizontal to vertical position and running of the casing string
- Provides optimal large-O.D. pipe handling by utilizing air-operated bowls and slips
