

# Complete Distributed Fibre Optic Sensing for your wells

Integrated DFOS intervention, data acquisition and interpretation from a global service company.

**Applications:**

- Leak detection
- Flow/injection monitoring
- Artificial lift assessment
- Behind casing crossflows
- Sand production
- Pre-abandonment surveys
- Slug detection/monitoring
- Clean-up monitoring
- Frac monitoring

**Benefits:**

- Well life extension
- Restoration of production
- Monitor dynamic behaviours (e.g. intermittent leaks)
- Rapid processing and interpretation
- Enables on-site decision making in hours
- Immune to EM effects
- Ideal for HP/HT applications
