## Carbon Capture Utilization and Storage

For clients working across the entire well lifecycle, Expro is the visionary full-cycle energy services expert offering novel, insightful solutions, dependable competency and award-winning safety.

Expro has excelled in the exploration and appraisal market for over 50 years, using the full range of technologies and services in an expansive portfolio including Well Construction, Well Flow Management, Subsea Well Access and Well Intervention and Integrity.

CCUS appraisal testing is critical for evaluating storage capacity, optimizing injection strategies, ensuring environmental safety and assessing economic viability. With decades of operational excellence, we partner with our customers to deliver high-quality data that meet test objectives, maximizing the value of each well.

**Proven experience  
delivering  
integrated testing  
services for  
flagship carbon  
storage projects.**

### Capabilities

- Surface Well Test
- Fluid Sampling and Analysis
- Drill Stem Testing
- Tubing Conveyed Perforations
- Wireless Downhole Monitoring and Control
- Subsea Well Access
- Well Intervention and Integrity
- Tubular Running Services
- Cementing and Drilling Technologies
- Wellbore Cleanout

### Expertise

- Production testing and injectivity testing
- Onsite aquifer fluid characterization
- Management of produced water
- Low pressure reservoirs
- Multizone testing
- Advanced well integrity techniques and products
- Well test design and strategy
- Integrated project management

### Why Expro?

- 50+ years of operational excellence in exploration and appraisal
- Proven Track record on key CCUS projects
- Experts across the well life cycle
- Leading technologies, products and services
- Outstanding Service Quality
- Award winning safety
