# Well Intervention and Integrity

## Carbon Capture Utilization and Storage

For clients operating across the entire well lifecycle, Expro is the trusted global leader delivering novel, insightful solutions, dependable expertise, and award-winning safety.

As a recognized leader in well intervention and integrity, Expro focuses on operational efficiency, providing high-quality well data paired with expert insights, and delivering fit-for-purpose solutions for well performance enhancement and well integrity remediation.

In the CCUS environment, our services are specifically designed to evaluate, remediate, and assure optimal CO<sub>2</sub> injection and permanent storage. Recognizing the critical role of well integrity in carbon storage projects, we leverage our extensive expertise and cutting-edge technologies to support your operations at each and every stage.

**Proven expertise  
in delivering well  
intervention and  
integrity solutions  
across the well and  
reservoir life cycle**

### Capabilities

- Annulus Intervention
- Cased Hole Services
- Chemical jetting
- Heavy Duty Fishing
- Petroleum Engineering Solutions
- Slickline Services
- Well Abandonment
- Well Services
- Well unloading

### Expertise

- Well Integrity surveillance, evaluation and remediation
- Well performance surveillance, evaluation and optimization
- Injectivity surveillance and evaluation
- Integrated project management

### Why Expro?

- 50+ years of operational excellence in well intervention
- Experts across the well life cycle
- Leading technologies, products and services
- Outstanding Service Quality
- Award winning safety
