Universal Cement Sub

Expro's Universal Cement Sub can be run in conjunction with the Multiple Dart Catcher. Depending on the application, this sub can be configured for either upjetting or downjetting, allowing for the most efficient placement of cement. Featuring a 4 1/2" IF (NC-50) connection up and a rounded guide nose, this tool is ideal for P&A, squeeze, and inner-string cementing. The sub allows for 4 different configurations to accommodate multiple wellbore conditions.

Specifications

Maximum torque through tool	30,700 ft-lb
