XRD Spider

The 1250 Ton XRD Spider is designed to be used during the drilling/tripping of drill pipe and running of landing string. The use of the XRD spider eliminates the need for multiple drilling spiders, which reduces run times.

The XRD spider uses wearable drilling guides and a slip design to pull inserts back to protect the inserts from being damaged while in use. The design allows for seamless rig integration and has industry leading slip crush capacity.

Features and benefits

- Wearable drilling guides
- Large tool body pass through
- Integrated grease system
- Split design allows for easy installation
- Utilizes rig controls for integrated safety features

Specifications

Dressing	5 7/8"	4 1/2"
Hoist load rating	1250 ton	1250 ton
Extended range	9 1/2" - 5 7/8"	8 1/2" - 4 1/2"
Tool body pass through	20 1/2"	19.8"
Torque capacity	60,000 ft (lbs)	60,000 ft (lbs)
Top guide ID	9 3/4"	9 3/4"
Rotary size	75 1/2"	75 1/2"
